

European Championships Munich 2022

General Guideline Covid-19

As of Saturday, 11th June 22, all COVID-19 entry restrictions to Germany have been temporarily lifted. From this date, entries to Germany are again permitted for all travel purposes (including tourism and visiting trips).

For entry into Germany, proof of vaccination, proof of recovery or proof of testing is no longer required.

For virus variant areas (currently no states are designated as virus variant areas) further entry restrictions would apply.

General recommendations for behavior

The legislator describes the following general behavioral recommendations in the current Infection Protection Measures Ordinance:

Distance:

Wherever possible, a minimum distance of 1.50 m should be maintained

Hygiene measures:

Hygiene rules should be observed at all times. This includes frequent and thorough hand washing as well as coughing and sneezing into the crook of the arm or into a paper handkerchief in everyday life

Wear a mask:

Especially indoors or if a distance of 1.50 m from others cannot be safely maintained, a FFP2 mask or a medical mouth-nose protection should be worn

Ventilation of indoor areas:

In closed rooms, care should be taken to ensure adequate ventilation

FFP2 mask or a medical mouth-nose protection

It is recommended to wear a FFP2 mask or a medical mouth-nose protection indoors and in transport vehicles during the European Championships Munich 2022.

Sufficient FFP2 masks and medical mouth-nose protection will be provided to the participants. The FFP2 and medical mouth-nose protection are to be worn only for single use or for the duration of one working day and then disposed of.

In outdoor areas it is recommended to always keep the minimum distance of 1.50 m between each other.

Hand hygiene

For thorough hand hygiene, frequent hand washing (at least 30 seconds with soap and water, followed by thorough rinsing) is recommended.

Sufficient disinfection dispensers are available for the use of hand disinfection, e.g. before entering and when leaving the venues.

Athletes & Teams Test Offer

Daily testing services are available to athletes and their teams.

POC antigen tests will be performed at the following Medical Center Athletes (MCA): Olympiahalle, Olympiastadion, Olympiapark, Messe München, Rudi-Sedlmayer-Halle, Odeonsplatz, Königsplatz, Regattaanlage

The test result will be delivered digitally after approx. 15 minutes. Registration is already possible in advance at: <https://www.ctest.info/registration>

POC antigen testing is offered daily from 08:00 - 12:00 at the above MCA.

Management of suspected Covid 19 cases and confirmed infections

If there is a positive result from an antigen test, the affected person should undergo PCR testing and be placed in isolation until the result is known.

Currently, the isolation period after a positive Corona test is 5 days. Access to the sports facility is then possible again if symptoms are absent for 48 hrs. If symptoms persist, isolation must be continued until signs of acute COVID-19 disease have been absent for 48 hours, but for a maximum of 10 days.

In the event of a confirmed Covid-19 infection, athletes and teams should contact the Medical Director Medical Service. He assists in obtaining a short-term appointment for a PCR test, with timely results.

Persons with a currently confirmed SARS-CoV-2 infection are not permitted access to the sports facilities including the spectator area. The accreditation expires until further notice.

If the person shares a room in the hotel, he/she must be transferred to a single room. The LOC Accommodation Team is available to ensure a smooth process. The cost of the isolation room is not covered by the LOC. The LOC Accommodation Team also provides support for planned departures and existing isolation.
